Summary

Dedicated MERN Stack Developer with hands-on experience building scalable and secure web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Skilled in developing RESTful APIs, implementing JWT-based authentication, and managing application state with Redux Toolkit. Experienced in delivering responsive, user-focused solutions while maintaining clean, maintainable code and optimized performance. Quick learner with strong problem-solving abilities and the ability to collaborate effectively within development teams.

Education

PMAS Arid Agriculture University Rawalpindi, BS in Computer Science
GPA: 3.9/4.0

Sept 2020 -- May 2024

Technical Skills

Programming Languages: JavaScript, TypeScript

Frontend: Next.js, Tailwind CSS, React.js, Redux Toolkit (RTK), Context API, ShadCN, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Multer, Webhooks, WebSockets

Database: MongoDB, Firebase, Supabase

Tools: Git, GitHub, Postman, Vercel

Experience

MERN Stack Developer | Deventia Tech

Apr 2026 -- Present

Developing scalable web applications and high-performance user interfaces. Implementing modern frontend states and robust backend services while optimizing application speeds, streamlining team git workflows, and collaborating on product features in an agile engineering cycle.

MERN Stack Developer & Intern | BXTrack Solutions

Nov 2025 -- March 2026

Initiated and developed responsive React-based applications from scratch, designing scalable component structures and implementing modern UI/UX practices using Tailwind CSS and Bootstrap. Developed and maintained full-stack web applications with secure authentication mechanisms and well-structured RESTful APIs to ensure reliable system performance. Promoted to Junior Developer to drive production pipelines, handle complex cross-platform application state integrations, and deploy features targeting high availability across internal dashboards.

NFTP Web Development Course | Certification

Aug 2023 -- Oct 2023

Completed a comprehensive web development certification covering core frontend and backend technologies. Gained practical skills in building responsive interfaces and working with modern JavaScript frameworks.

Projects

AuraWear | Next.js, Tailwind CSS, Node.js, Redux Toolkit

In Production

Engineered a modern, production-grade e-commerce application and premium fashion store clothing brand. Programmed fluid content architectures, highly dynamic catalog sorting systems, and responsive layouts utilizing Next.js layout structures and Tailwind CSS. Developed robust state management modules and client-server synchronization endpoints to maintain seamless checkout flows and real-time inventory tracking.

AquaRide -- Water Delivery Application | *Next.js, TypeScript, Firebase, Redux Toolkit*

aquaridegh.com

Engineered an on-demand, ride-hailing style water logistics application modeled after dynamic ride-sharing frameworks. Implemented split-role management containing secure separate flows for Owner and Administrator controls alongside real-time fulfillment pipelines. Programmed state observation algorithms using TypeScript, Next.js, and automated synchronization engines using Firebase.

Tadbeer Resource Platform | *React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT, Multer*

tadbeerresource.com

Developed a full-stack NGO community resource management platform featuring modular portals for scholarship applications, real-time grant processing, and scheduled user consultations. Implemented robust workflows with status checking, secure JWT authentication tokens, role-based entry gates, dynamic uploads, and Redux Toolkit state stores.

JMK -- Islamic Teaching Institute | *Next.js, Tailwind CSS, Redux Toolkit*

In Production

Built and deployed a production-grade web application platform for an Islamic teaching institute. Implemented clean user pathways, streamlined responsive layouts with Next.js, and structured dynamic resource handling to optimize content access for students and administrators.

Side Quest | *Next.js, Tailwind CSS, TypeScript, Redux Toolkit*

Development Phase

Developing a comprehensive e-commerce and shopping center hub allowing seamless product curation and procurement workflows. Built interactive features where clients buy groceries, combined with an active on-demand fulfillment pipeline enabling users to instantly hire and match with local delivery drivers. Implemented optimized routing layout layers using Next.js and secure state management paths with Redux Toolkit.

Digital Eve (FYP) | *Next.js, Clerk.js, Tailwind CSS, Three.js, Node.js*

digital-eve.vercel.app

Built a dynamic 3D e-commerce platform enabling users to design, customize, and order top-wear apparel with real-time previews for my Final Year Project (FYP).

Soft Skills

Problem-Solving & Analytical Thinking · Clean Code & Attention to Detail · Effective Communication & Team Collaboration · Time Management & Deadline-Oriented · Adaptability & Continuous Learning · Strong Leadership Ethics & Management Skills
