Muqaddas Waheed

Rawalpindi, Pakistan | muqaddaswaheed0@gmail.com | 03222450019 | |

Summary

Dedicated MERN Stack Developer with hands-on experience building scalable, secure, and responsive web applications using React.js, Next.js, Node.js, Express.js, and MongoDB. Skilled in RESTful API development, JWT-based authentication, role-based access control, and state management with Redux Toolkit. Experienced in delivering production-focused solutions with clean architecture, optimized performance, and seamless client-server integration. Quick learner with strong problem-solving skills and a passion for continuously learning modern technologies.

Education

PMAS Arid Agriculture University Rawalpindi Sept 2020 – May 2024
BS in Computer Science
CGPA: 3.9/4.0

Technical Skills

Programming Languages: JavaScript, TypeScript
Frontend: React.js, Next.js, Tailwind CSS, Bootstrap, Redux Toolkit (RTK), Context API, ShadCN
Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Multer, Webhooks, WebSockets
Databases & ORM: MongoDB, PostgreSQL, Supabase, Neon, Prisma, Firebase
Payments & Integrations: Stripe, PayFast
DevOps & Deployment: Docker, CI/CD, Vercel, Render, Railway
Tools: Git, GitHub, Postman

Experience

Senior MERN Stack Developer | Deventia Tech Apr 2026 – Present
Developing scalable full-stack web applications and high-performance user interfaces using modern JavaScript technologies. Implementing robust backend services, application state management, API integrations, and optimized application workflows while collaborating with development teams in an agile engineering environment.

Node.js Developer | BXTrack Solutions Nov 2025 – Mar 2026
Built and maintained backend services and RESTful APIs using Node.js and Express.js, implementing secure JWT authentication, role-based access control, and file handling with Multer. Integrated databases and third-party services for reliable client-server communication while collaborating through Git-based workflows, contributing to production pipelines and internal dashboard deployments.

Frontend Developer & Intern | HHTechHub Nov 2024 – Aug 2025
Joined as a Frontend Intern and was promoted to Frontend Developer. Initiated and developed responsive React-based applications from scratch using scalable component structures, Tailwind CSS, and Bootstrap. Integrated RESTful APIs and managed application state with Redux Toolkit while collaborating through Git-based workflows to deliver production-ready interfaces.

Projects

AquaRide – Water Delivery Application | *Next.js, TypeScript, Firebase, Redux Toolkit* **aquaridegh.com**
Engineered an on-demand water delivery platform with separate Owner and Administrator workflows and real-time fulfillment management. Implemented secure role-based flows, responsive interfaces, and Firebase-powered synchronization for efficient order and delivery operations.

AuraWear | *Next.js, Tailwind CSS, Node.js, Redux Toolkit* **aurawear-fe-smoky.vercel.app**
Engineered a production-grade fashion e-commerce platform with dynamic product catalogs, responsive layouts, and optimized checkout workflows. Implemented scalable state management and client-server synchronization to support seamless shopping experiences and real-time inventory handling.

Boxing Therapie Premium | *Full-Stack Web Application* **boxingtherapiepremium.ch**
Developed a full-stack booking platform with a customer-facing website and administrative panel for managing training sessions and reservations. Implemented user booking workflows, slot management, and administrative controls to streamline appointment scheduling and provide a seamless booking experience.

Tadbeer Resource Platform | *React.js, Node.js, Express.js, MongoDB, Redux Toolkit, JWT, Multer* **tadbeerresource.com**

Developed a full-stack NGO management platform with dedicated Admin and User dashboards, scholarship and grant workflows, secure JWT authentication, protected routes, role-based access control, and dynamic file uploads. Integrated RESTful APIs and Redux Toolkit for reliable client-server communication and efficient application state management.

Side Quest | *Next.js, TypeScript, Redux Toolkit* **In Production**

Developed an e-commerce and local delivery platform supporting product purchasing and on-demand driver matching. Implemented optimized routing structures, interactive user workflows, and centralized state management using Next.js and Redux Toolkit.

Additional Projects: Digital Eve – 3D fashion e-commerce platform with real-time apparel customization; JMK – Islamic Teaching Institute, a production web platform with responsive layouts and structured content management.

Certifications

NFTP Web Development Course **2025**

Completed comprehensive web development training covering responsive frontend development, modern JavaScript frameworks, backend fundamentals, and practical web application development.

Soft Skills

Problem-Solving & Analytical Thinking · Clean Code & Attention to Detail · Effective Communication & Team Collaboration · Time Management · Adaptability & Continuous Learning · Critical Thinking
